Professional Summmary!

Highly skilled Associate Developer with over one year of experience in software engineering, specializing in MERN stack development and Java. Demonstrated mastery in optimizing software solutions, implementing cutting-edge technologies, and enhancing team collaboration. Adept at streamlining processes for increased efficiency and delivering impactful results through strong troubleshooting and strategic implementation. Well-versed in interpersonal and communication skills and able to handle pressure, consistently delivering best efforts for organizational growth.

Skills

- **Programming Languages:** JavaScript, Java (Beginner), HTML, CSS, Tailwind CSS
- **Frameworks/Libraries:** React, Node.js, Express.js, React Native
- **Database:** MongoDB, SQL, firebase
- **Tools:** Figma, IntelliJ, JIRA, Ajax, WordPress
- **Version Control:** Git/GitHub

Education

B.Tech in Electrical and Electronics Engineering

June 2018 – June 2022

Sir C Reddy College of Engineering, Eluru

GPA: 7.4/10

Experience

MERN Stack Developer / Trainer

April 2025 – Present

CCC Digital Private Limited Hyderabad

- Developed and maintained the company's internal learning management website used to track training records, client progress, and project submissions.
- Built and optimized features for the learning portal including user dashboards, course tracking, authentication, and admin management panels.
- Collaborated with UI/UX teams to ensure responsive and accessible design for the learning platform across devices.
- Implemented secure user management and authorization flows to differentiate roles like students, trainers, and admins.
- Delivered full-stack web development training using MongoDB, Express.js, React.js, and Node.js to batches ranging from 50 to 180 students per session.
- Designed structured course modules and hands-on projects to help students gain practical experience in frontend and backend development.
- Mentored students on building complete full-stack applications including authentication, RESTful APIs, CRUD operations, and third-party integrations.
- Guided and assessed student capstone projects, focusing on real-world scenarios to strengthen problem-solving and application design skills.
- Provided one-on-one and group mentoring sessions to resolve doubts, improve code quality, and encourage best practices.
- Integrated MongoDB for storing structured client data including course enrollments, video progress, and submitted projects.
- Contributed to the continuous improvement of the training curriculum based on student feedback and industry trends.

Freelance Full Stack Developer – Smart Farmer Project

July 2025 – August 2025

[Live Project Link](#) 

- Designed and implemented the entire project individually from scratch, handling both frontend and backend.
- Built the backend with Node.js and Express.js, ensuring clean API design and secure endpoints.
- Developed a responsive React.js frontend with dynamic UI for easy navigation and better user experience.
- Integrated Firebase Authentication to enable secure login and account management..
- Added payment gateway integration using VeleVPay to handle secure online transactions.
- Utilized Firebase Storage for storing and managing project assets.
- Implemented real-time functionalities using Firebase services to enhance client-side interactions.
- Ensured smooth communication between frontend and backend with REST APIs.
- Handled end-to-end deployment of both frontend and backend on client's hosting platform..
- Delivered a fully functional product directly to the client, showcasing ownership of the complete lifecycle.

MERN Stack Trainer

March 2025 – April 2025

StudentTribe

- Conducted intensive MERN stack bootcamps for college students, focusing on building scalable web applications.
- Developed and delivered interactive sessions on React.js, Node.js, and MongoDB, with practical coding labs.
- Assisted students in project-based learning, covering authentication, RESTful APIs, and deployment best practices.
- Provided personalized mentoring, code reviews, and troubleshooting support to enhance student learning outcomes.
- Coordinated with StudentTribe's curriculum team to align content with industry requirements and student feedback.

Associate Developer

July 2022 – July 2023

SAPIENS, Bengaluru

- Contributed to the development of the Medical Protection System (MPS) project, collaborating with cross-functional teams to enhance its functionality and address discrepancies.
- Designed and implemented insurance policy management panels and contact management modules, adhering to industry standards.
- Integrated third-party APIs for functionalities such as inventory management and payment processing, ensuring smooth operations.
- Participated in debugging and resolving application-level issues to improve the system's reliability and maintain data integrity.
- Designed RESTful APIs to support seamless communication between the frontend and backend, enabling a more interactive user experience.
- Created unit and integration tests to validate new features and prevent bugs in production.
- Assisted in optimizing database queries for enhanced performance in retrieving insurance-related data.
- Worked closely with senior developers to ensure the project's modules were delivered on time and met client expectations.
- Gained hands-on experience in agile development methodologies, including sprint planning, daily stand-ups, and retrospectives.
- Contributed to detailed project documentation, assisting team members in understanding key workflows and technical dependencies.

Freelancer (Developer, Trainer)

Jan 2024 – current

- Conducted interactive sessions on HTML, CSS, JavaScript, and MongoDB for college students.
- Developed curriculum and learning materials for web development.
- Provided guidance and support for student projects.
- Built a college website using WordPress and integrated plugins for enhanced functionality.
- Designed and developed mobile applications using React Native.

- Integrated WordPress plugins to extend website functionality, ensuring optimal performance and user satisfaction.
- Utilized Tailwind CSS to create responsive and aesthetically pleasing web interfaces, ensuring consistency across different devices.
- Created interactive and user-friendly prototypes using Figma, translating client requirements into visually compelling designs.

Projects

Video App Management System

Description: Developed a full-stack video app management system designed for streaming and managing video content. The system enables users to upload, manage, and stream video content seamlessly, with features for user authentication, video categorization, and responsive playback.

Technologies Used:

Frontend: React.js, HTML, CSS, JavaScript

Backend: Node.js, Express.js, MongoDB

Authentication: Implemented user authentication using JWT for secure access to video content

Deployment: Hosted the application on a cloud platform for scalable and reliable access

Features:

- User registration and authentication with secure session management
- Video upload, management, and categorization features for organized content delivery
- Responsive video player with support for various formats and resolutions
- Interactive user interface with smooth navigation and real-time updates
- RESTful API integration for efficient communication between frontend and backend

Movie Search Application

Description: Developed a web application that allows users to search for movies, view details, and discover trending films. The application provides an intuitive interface for exploring a wide range of movie data sourced from a public API.

Technologies Used:

Frontend: React.js, HTML, CSS, JavaScript

API Integration: Integrated with the OMDb API to fetch and display movie details

Features:

- Real-time search functionality with dynamic filtering options
- Detailed movie information, including ratings, cast, and synopsis
- Responsive design for optimal viewing across various devices
- User-friendly interface with smooth navigation and search experience

E-Learning Platform

Description: Developed a responsive e-learning platform focused on delivering online courses and managing student engagement. The platform allows users to browse, enroll in, and track their progress through various courses.

Technologies Used:

Frontend: HTML, CSS, JavaScript, React.js

State Management: Managed application state using React's built-in features

Features:

- Course browsing and enrollment with an intuitive user interface
- Responsive design ensuring accessibility across desktop and mobile devices
- Interactive student dashboard for tracking course progress
- Client-side form validation for enhanced user experience

Certifications

- MERN Full Stack Certification, CAREER X
- Certification in Generative AI Fundamentals, Google
- Certification in Agile, J P Morgan Chase & Co
- Maang Career Certification, Maang Careers
- Software Engineering Job Simulation, Hewlett Packard Enterprise
- Cybersecurity Analyst Job Simulation
